

## DPG260 Low Accuracy Field Digital Pressure Gauge

DPG260 Digital Pressure Gauge is portable, field digital gauge. With advanced microprocessor technology and state-of-the-art silicon pressure sensors, DPG260 test gauges provide a reliable economic solution for pressure application in the industries of power, chemical, petrol, oil & gas metallurgy, metering, etc. Every DPG260 Digital pressure gauge passes the high and lower temperature aging, so it could assure the products more accurate and reliable.

### Features:

- ◆ 4 digit LCD showing the pressure accurately in real time
- ◆ Different pressure units to change, zero clearing, backlight, on/off
- ◆ 304 Stainless steel housing
- ◆ Pressure units available (bar, psi, kPa, Kg/cm<sup>2</sup>, Mpa);
- ◆ Battery powered, low-power design keeping working for 12 months,
- ◆ Low voltage alarm,
- ◆ All stainless steel shell, small size

### SPECIFICATION:

Range	(-0.1~25)MPa
Over Pressure	150%
Acc.	1%FS(20±5℃)
Size	65mm
Backlight Color	White
Supply	3V(2 batteries of AAA)
Long-term Stability	Typical : ±0.5%FS/ year
Operating Temperature	20±5℃
Compensation Temperature	10~30℃
Electric Protection	En61326
Sampling Frequency	Gas, liquid, water
Pressure Connection	G1/4, M14*1.5 or screw customized
Connector Material	304SS
Shell	304SS(cell box is engineering plastics)
Function	On/off, zero clearing, units changing, backlight

### Product Size
