

KT70 Pressure Comparator

KT70 portable water pressure calibration bench is composed of pressure regulating valve, check valve, micro adjustment valve and pressure output interface. It has an overall curing structure, novel style, simple operation, easy maintenance, good sealing performance, stable pressure rise, fast speed, labor saving, simple operation, etc. It is an ideal replacement product of piston pressure source. Economical and affordable, light weight, small volume and easy to carry. It is suitable for laboratory and on-site measurement pressure verification and detection

Specifications

- 1 Generated pressure range: (0~400)bar, (0~600)bar
- 2 Stability: 0.05% F · S
- 3 Working media: Distilled water
- 4 Material:Body:Stainless steel
- 5 Seals:Buna-N
- 6 Output interface connection: M20×1.5Female,
- 7 Weight:9kg
- 8 Dimensions: 360 * 280 * 210 (mm)

Function

KT70 provides pressure for calibrating pressure gauges, such as pressure (different pressure) transducers, precision pressure gauges, general pressure gauges and other pressure gauges. It can be widely used in power, chemical, petrol, metallurgy, metering, military industry, etc.

Characteristics

- ◆ Easy operation, saving labor.
- ◆ Fast connection, quick pressurizing
- ◆ Increasing pressure easily, convenient maintenance.
- ◆ The appearance is simple & beautiful.
